ROTATOR X

Now available for OculusGo!

RotatorX is an endless runner type arcade game with a dark unique sci-fi atmosphere. Fast paced and addictive - but also meditative. The intuitive controls makes it easy to play - but it's hard to gain. Speed, procedural level design, dynamic lighting FX and an adaptive soundtrack will guarantee a challenging and immersive VR experience.
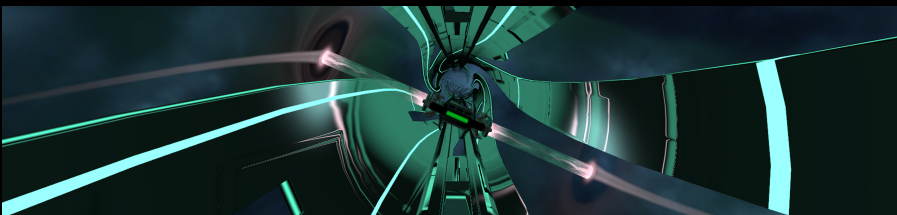

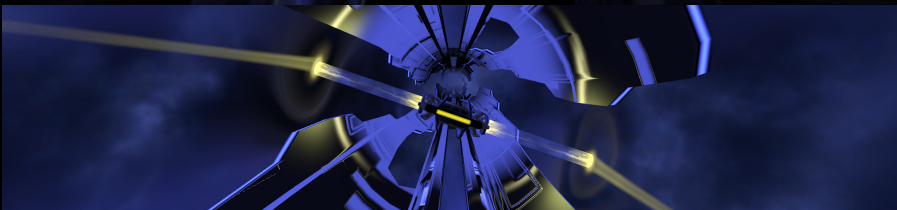

KEY FEATURES
- Dynamic lighting FX
- Adaptive soundtrack
- Intuitve controls
- Procedural level design

DEFICIT GAMES

We are a germany based indie game studio with main focus on VR.

Our core team consists of a cat and two interdisciplinary lateral entrants with an artistic background.

In October 2017 we released our first VR title "virtual MINIGOLF reality" on the Daydream platform. RotatorX is our second release. Both games place a special emphasis on intuitive and responsive controls, which is in general one important goal of our work.
